This rate is subject to change from time to time.

When does my policy acquire Surrender Value?

Your policy acquires a Surrender Value after all the due premiums have been paid for at least 3 full years for regular and limited premium payment policies and immediately after policy commencement date for single premium policies. You may terminate the policy before death during the Policy term by surrendering the policy. On surrender, the higher of Guaranteed Surrender Value and Special Surrender Value will be paid. These will be calculated as follows:

- **Guaranteed Surrender Value:**
  The guaranteed surrender value for regular and limited premium policies will be set equal to 30% of premiums paid under the base policy if the policy is surrendered in the 3rd year of the policy. For Single Premium policies 70% of Single Premium will be the Guaranteed Surrender Value if the policy is surrendered within 3rd year of the policy.

  If the policy is surrendered anytime between the 4th year of the policy and 7th year of the policy the guaranteed surrender value for regular and limited premium policies will be set equal to 50% of premiums paid under the base policy and for Single Premium policies, the guaranteed surrender value will be set equal to 90% of Single Premium.

  From the 8th year onwards, the guaranteed surrender value will be the percentage factor, based on policy term and policy year of surrender, applied to the premiums paid under the base policy for regular and limited premium policies and equal to 90% of Single Premium for single premium policies. The sample guaranteed surrender value factor for premium is mentioned below:
The surrender value of the bonuses allocated to the policy will also be added to the Guaranteed Surrender Value. This will be calculated as the applicable percentage factor, based on policy term and policy year of surrender, applied to the bonuses allocated to the policy.
